PROFILE

Software Engineering student and systems developer with hands-on experience building TypeScript/Node.js services, PostgreSQL-backed workflows, privacy safeguards, automated tests, and Kubernetes deployment checks. Interested in backend and infrastructure engineering; builds projects in Python and C++.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C++, SQL; Java (learning)

Backend & data: Node.js, API development, PostgreSQL, SQLite

Infrastructure & quality: Kubernetes, Kustomize, Docker, Podman, CI/CD, Git, Vitest, automated testing, data privacy

Web: HTML5, CSS3, Flexbox, responsive design

EXPERIENCE

Lead Developer, Internal Systems (Part-time) | Human Intellect (Project Human City)

Toronto, ON | Oct 2026-Present

- Develop and maintain TypeScript/Node.js verification and attestation services, including signed issuance workflows.
- Update PostgreSQL schemas and migrations, and add automated test coverage with Vitest.
- Strengthen privacy protections through personal-information detection and redaction across logs, events, exports, and error surfaces.
- Improve CI/CD and Kubernetes deployment checks, including readiness probes and canary rollout validation.

A.I. Development Intern | Project Human City

Remote | May 2026-Sep 2026

Contributed to backend services, testing, privacy controls, and deployment workflows before moving into the systems lead role.

Customer Service Associate, Loader & Store Clerk (Part-time) | Bathurst Village Market

North York, ON | Apr 2024-Present

Support customers, resolve service issues, maintain inventory accuracy, and coordinate deliveries safely.

PROJECTS

TCP Chat Application | Python, TCP, SQLite | [GitHub](#)

Built a threaded client-server chat app with registration/login, salted PBKDF2 password hashing, and persistent chat history.

FromSoftware / Souls-like Explorer | Python | [GitHub](#)

Created a CSV-based CLI tool to list games, filter by year or Metacritic score, and calculate summary statistics.

Templated Weighted List Container | C++17 | [GitHub](#)

Implemented a templated container with access-weight updates, search, erase, and promotion of frequently accessed values.

Personal Portfolio Website | HTML, CSS, JavaScript | [Live site](#) | [GitHub](#)

Built a responsive portfolio with section navigation and direct links to project repositories and resume.

EDUCATION

Bachelor of Engineering (Software Engineering) (BSA) | Seneca Polytechnic | Toronto, ON

Expected Apr 2028 | GPA: 3.1 | Relevant coursework: Web Programming and Scripting; Software Development and Deployment; Object-Oriented Programming; Operating Systems; Database Design Principles
